WALK : Praia Verde

Circular Path

Total Distance: 7,1 km

Overall Ascent: 96,22 m

Overall Descent: 83,43 m

Maximum Altitude: 49,52 m

Minimum Altitude: 9 m

About 1km of this path goes through the property, crossing the traditional dryland orchard, a small orange and apricot grove, and the pinewood, until you get to the EN125. From there, just 500m more across the Praia Verde complex, which stands out from within the stone pine woods.

We suggest that you return through Cabeço beach. After crossing EN125, there is a way uphill with a beautiful view of the mouth of Guadiana, whose creeks reach the foothills of S. Bartolomeu village.
